

Ritik Sharma

AI/ML Engineer (Fresher)

Motivated and detail-oriented developer with experience in Python, machine learning, and computer vision. Skilled in building real-world projects such as traffic detection systems and AI-based applications. Passionate about learning new technologies and applying them to solve practical problems.

PERSONAL PROJECTS

Crop Health AI | Computer Vision, YOLO, Deep Learning (03/2026) [🔗](#)

- Developed AI-powered crop health monitoring system using YOLOv8 object detection • Detects plant diseases and pest infections in real-time from image analysis • Achieved high accuracy in agricultural disease classification

Driver Safety AI | OpenCV, MediaPipe, Real-time Processing (03/2026) [🔗](#)

- Created **Driver Safety AI | Python, OpenCV, MediaPipe, Flask** Developed a real-time driver monitoring system that detects drowsiness and yawning using facial landmark analysis (EAR & MAR). Integrated live video streaming, IP camera support, and audio alerts to enhance road safety through real-time fatigue detection.

Smart ATS Resume Screening System | NLP, Flask, Semantic Search (02/2026) [🔗](#)

- Built intelligent resume screening platform using Sentence Transformers for semantic similarity • Performs automated candidate-job matching reducing manual screening time by 60% • Full-stack application with professional SaaS-level interface

SmartNewsVerifier | NLP, ML, OCR, LLMs (03/2026) [🔗](#)

- Developed fake news detection system analyzing both text and image content • Integrated OCR for text extraction from images and local LLM for explanations • Combines multiple ML models for comprehensive news verification

Mental Health Companion | Chatbots, Emotion Detection, NLP (03/2026) [🔗](#)

- Created AI-powered mental health support application with conversational chatbot • Implemented real-time emotion detection from video using computer vision • Performs sentiment analysis on user input for personalized wellness support
